

AIR CONDITIONING
COPPER THEFT SOLUTION

What is the cost of doing nothing? It's important to know....

Air conditioning coils can be stolen in a matter of minutes.

Replacement of just a single HVAC system can cost over \$15,000.00; how many do you have?

Repair of a condenser coil, cut by an attempted theft can cost over \$3,000.00. How early in the theft process would you like to detect an attempt?

A theft during the winter can go un-noticed until the following spring, causing additional damage and adding considerable cost to repair. Exposes the compressor oil to moisture and contaminants will ruin it and require an entirely new system.

The Government standards for energy efficiency have been raised and the EPA requirements for refrigerants had drastically changed. If your outdoor unit is stolen you will need to replace all of your equipment and in some cases even the very expensive copper refrigerant lines. This can cost you over \$14,500.00 per unit to replace on a typical 2000 sq ft area. How large is your home or business?

Roof mounted units are prime targets because they are not seen, which allows ample of time to steal them all.

What is the cost of closing your business or moving into a hotel for a day or two because there is no cool air or heat?

Replacement of equipment can take days. Turn your air or heat off right now and see how long it takes to notice a difference. Some units are special order and take weeks to manufacture. Can you afford to close your business for several weeks?

Insurance companies can drop your coverage after 3 theft claims. Once dropped by your insurance carrier obtaining coverage will be costly if available at all.

Appearance is perception; cages on air conditioners are like burglar bars on windows, what does this say about the neighborhood and property value.

Quality cameras are expensive and provide nothing but video to remind you of being a victim. CopperWatcher is engineered to work with the system best suited to detect theft, your security system.

Loss of revenue, lost customers, loss of sleep, loss of coverage, higher premiums, anger, frustration, what's the cost of doing nothing to you?
